Keep your code clean

GoQu

As our businesses digitise, code quality becomes ever more significant.

GoQu Suite is a set of tools dedicated to support code review process for Guidewire products.

Even a small error in core system code base may contribute to significant losses of time and resources. Especially, as these infractions tend to accumulate over time.

GoQu dev — GOSU QUALITY ASSURANCE

Assists developers with code analysis directly in Guidewire Studio, preventing bad code from ever being written.

GoQu hub — GOSU QUALITY ASSURANCE

Enables code quality monitoring of your Guidewire Centers, providing IT leadership with transparent reports.

GoQu web — GOSU QUALITY ASSURANCE

Combines the features of GoQu Hub and Web to be used in portals world.

Thanks to Sollers' vast experience in implementing Guidewire products, we managed to create GoQu - the best static code analysis suite for Guidewire products on the market.

It tracks **over 120 types of bugs, code smells** and **vulnerabilities** and suggests proper actions to eliminate every single one of them.

Key benefits

✔ CODE STANDARISATION

✔ FASTER DELIVERY

✔ REDUCED TECHNICAL DEBT

✔ LESS ISSUES AND BUGS

✔ EASIER UPGRADES

✔ QUALITY MONITORING
